Education

Vidya Jyothi Institute of Technology

2024 – 2028

Information Technology

Hyderabad, Telangana

Relevant Coursework

- Data Structures
- Python
- Artificial Intelligence
- UI/UX Design
- Operating Systems
- Database Management
- Internet Technology
- Computer Architecture

Experience

Startup, Native Nest

November 2025

App Developer

Bangalore, Karnataka

- Assisted in development of the front end of a mobile application for iOS/Android using Dart and the Flutter framework.
- Designed and developed a mobile-first AI learning application with a unified dashboard experience, focusing on performance, usability, and clean UI/UX.
- Implemented AI-powered features including personalized learning insights, analytics, and practice modules
- Optimized app performance and responsiveness across mobile devices using modern development practices.
- Used Git for version control and collaborated on feature development and testing.

Projects

Live AI Meeting Assistant | *React, AI APIs, Authentication, Node.js*

2025

- Developed a real-time web-based meeting platform with live video, audio, chat, and screen sharing using modern technologies
- Implemented an inbuilt voice-based AI agent that listens to live sessions, responds interactively on command, and generates post-session summaries.
- Built secure meeting creation and join flows using unique meeting links and codes, enabling multiple users to join the same session reliably.
- Integrated real-time communication, speech-to-text, text-to-speech, and AI summarization pipelines for end-to-end live intelligence.

Smart Hostel Room Allocation System | *MySQL, DBMS, HTML, CSS, JavaScript*

2025

- Designed and implemented a database-driven system to manage hostel rooms, students, complaints, and visitor records.
- Wrote complex SQL queries with JOINS, GROUP BY, HAVING, and aggregate functions to generate hostel analytics and reports.
- Developed a responsive web interface to visualize room availability, complaint status, and visitor logs for efficient hostel administration.
- Implemented SQL stored procedures and triggers to automate room allocation, enforce data integrity, and prevent double booking and capacity violations.

Emoji Memory Matching Game App | *C, Data Structures, Nodes*

2025

- Developed an interactive memory-matching game application using C that leverages linked lists for dynamic card storage and state management.
- Implemented Fisher–Yates shuffle, node traversal, and string comparison to randomize gameplay and efficiently detect matching pairs.
- Applied dynamic memory allocation, pointer manipulation, and core data structure algorithms to build a scalable and modular game engine.

AI-Powered Fitness Assessment Platform | *Flutter, TensorFlow Lite, MediaPipe, MySQL, React.js*

2025

- Developed a cross-platform mobile fitness application using Flutter (Dart) with offline-first architecture for real-time athletic assessments.
- Implemented AI-based pose estimation and skeleton tracking using MediaPipe and TensorFlow Lite for automated rep counting, form analysis, and difficulty scaling.
- Designed a React.js admin dashboard to monitor athlete data, leaderboards, engagement metrics, and content moderation.

Technical Skills

Languages: C, C++, JavaScript, SQL, Python, Java, HTML, CSS

Developer Tools: Visual Studio Code, Android Studio, Eclipse, Git, GitHub

Technologies/Frameworks: React.js, Node.js, Flutter, MySQL, Database Management Systems (DBMS), WebRTC, WebSockets, REST APIs, AI APIs, Speech-to-Text, Text-to-Speech

Leadership / Extracurricular

Street Cause

Present

Executive Board and Digital Media Head

Vidya Jyothi Institute Of Technology

- Spearheaded a creative team of 20+ members to execute data-driven digital marketing strategies, significantly enhancing brand visibility and community engagement.
- Optimized content delivery by leveraging social media algorithms, resulting in a measurable increase in organic reach and audience retention across all official channels.
- Developed and executed comprehensive marketing roadmaps that aligned with organizational goals, securing a dominant digital presence within the college community.

DevUp Society

Present

Social Media And Influence Lead

Vidya Jyothi Institute Of Technology

- Leveraged technical proficiency to automate social media workflows, utilizing tools like [e.g., Python scripts/Canva/Notion] to streamline content scheduling and analytics tracking.
- Contributed to the organization's open-source projects/website, ensuring the digital interface aligned with the marketing narrative and user experience goals.
- Developed and executed comprehensive marketing roadmaps that aligned with organizational goals, securing a dominant digital presence within the college community.

Google Developer Group On Campus

Present

Design Team member

Vidya Jyothi Institute Of Technology

- Conceptualized and designed high-fidelity UI/UX prototypes for club projects and event websites, adhering to Material Design principles to ensure a seamless user experience.
- Revamped the organization's visual identity by creating professional-grade graphics and event posters using Figma and Adobe Creative Suite, directly contributing to a surge in event registrations.
- Collaborated with cross-functional technical teams to bridge the gap between design and development, ensuring feasible implementation of UI concepts into live web applications.
